A serious workplace accident creates a host of challenges for those advising corporations – whether internally or as external counsel. A myriad of issues can arise ranging from managing the steps necessary to comply with immediate legal obligations through to conducting an effective internal investigation and managing the investigations and actions of government regulators. An effective and efficient response will help minimize and manage the resulting legal and reputations risks to the organization and its supervisors, managers, officers and directors.

From both the in-house and external counsel perspective, this webinar will provide practical commentary through discussion of best practices for responding to serious workplace accidents and the challenging issues that can arise. **Trisha Gain**, of Kiewit Canada Group Inc., and **Madeleine Loewenberg**, of Loewenberg Psarris Workplace Law, who each have significant direct experience in advising organizations responding to workplace accidents, will address a range of issues including:
